

Le traitement du sens et la phraséologie collocationnelle dans le *Dictionnaire françois* de Pierre Richelet (1680)

The processing of meaning and collocational phraseology in Pierre Richelet's *Dictionnaire françois* (1680)

Cosimo De Giovanni

Abstract: The present study examines the role of phraseology, especially collocational phraseology, in the semantic organization of the lexicon of the *Dictionnaire françois* by Pierre Richelet (1680). The aim of this study is to demonstrate that there is a direct relationship between the collocational information, located at end of each lexicographical article, and the material presentation of the definitional field. The latter is ensured through the implementation of the usage definition alongside the semantic definition. This work is studied within the field of historical metaphraseography based on the theoretical and descriptive principles of historical metalexigraphy.
